All client information is kept confidential. Clients review materials before they are released to agencies for review and acceptance.

Please inquire about additional services you may need.

Asbestos Inspections

We are EPA/AHERA-accredited and sample suspect asbestos-containing materials (ACMs) for laboratory analysis. Our detailed asbestos survey reports include drawings, photographs, laboratory results, tables, findings, and recommendations. We carefully follow federal, state, and local regulations.

Site Assessments

We have a strong knowledge of current State and Federal regulations, as well as procedures and policies related to Phase I and Phase II environmental site assessments. We complete property transfer assessments and remedial investigations using ASTM methods and USEPA protocols. We not only discover problems, but also suggest and evaluate appropriate methods of cleanup.

Removal/Fill permits

Rabe Consulting's staff prepares and submits removal/fill permits for Division of State Lands and Army Corps of Engineers for review and approval. Our relationship with these agencies and local regulators is exemplary, facilitating an efficient permit process and saving time for our clients.

Storm Water Permitting

We provide storm water permit application preparation and compliance documentation, including National Pollutant Discharge and Elimination Systems (NPDES) permits.

Wetland Delineations and Determination

Our scientists are trained by certified environmental trainers. We conduct delineations in accordance with the Army Corps of Engineers 1987 Wetland Delineation Manual.

Wetland Mitigation

Rabe Consulting staff has extensive knowledge in mitigation planning, design, construction, and monitoring for both streams and wetlands. We will analyze and propose several mitigation options finding the best fit for the client's needs and budget.

NEPA Compliance

Rabe Consulting is experienced in NEPA document preparation, including Environmental Assessments, Environmental Impact Statements, and Biological Assessments. We work closely with agencies to expedite the compliance process.

Endangered Species Surveys

We conduct surveys for threatened and endangered species throughout the Pacific Northwest. We examine sites for the presence of threatened or endangered species, map their locations, and prepare a report for submission to interested regulatory agencies.
